LITEPAPER (v. 0.5)

CRYPTOOLS AI

Our Vision

Project owners can leave the burden of technical stuff about launch of a token on blockchain to Cryptools AI for automated creation of all tools needed for launching the token so they will have more focus on marketing side of the project.

Cryptools AI will deliver its services with the simplest yet the best User Experience for its users and it will be accessible via a Telegram Bot in 1st phase. Web-based control panel and discord bot will be added on next steps as well.

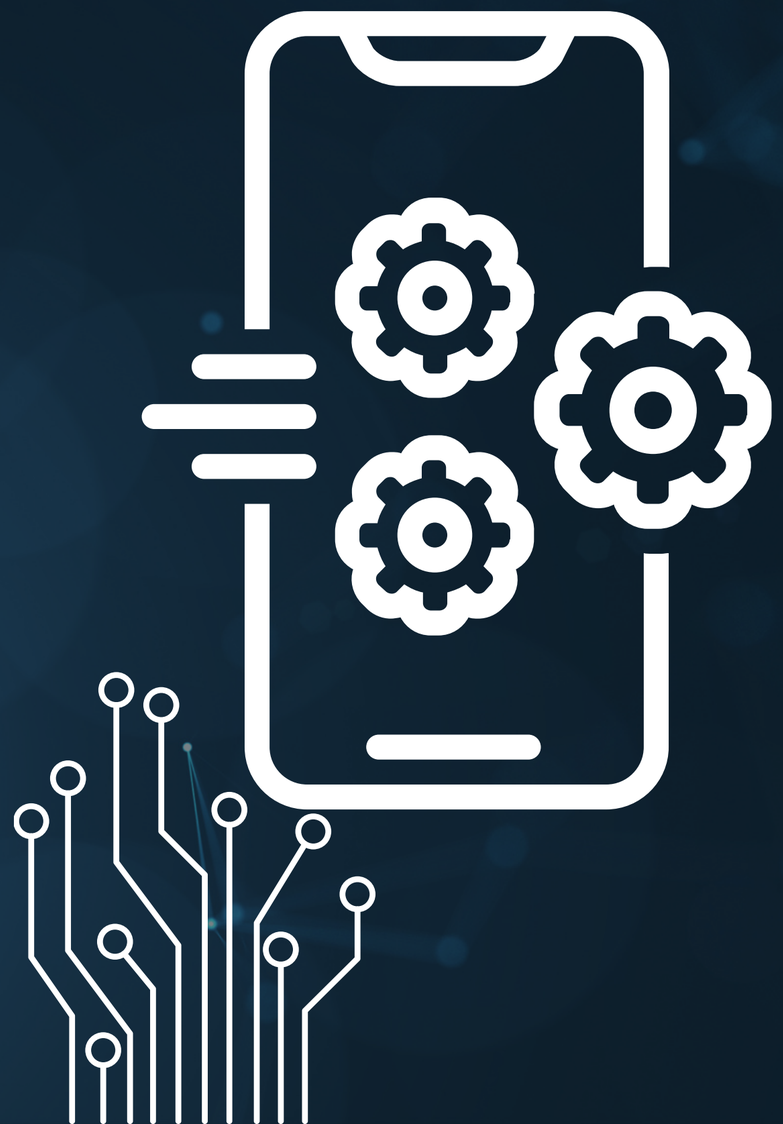
Ecosystem & Products

LaunchAI

You can launch your token using LaunchAI less than minutes, all tailored by your needs. Just tell the product what you need and it will launch your project in the most simple and easy way.

LaunchAI will be accessible through a Telegram Bot, Discord Bot and Web application. Also We will make sure all launches are with 100% safe and scam-free written contracts within our AI. We are going to make crypto token launches more fair with giving out the smart contract address to the community and owner all at the same time.

LaunchAI will be available first on Ethereum, next on BSC and then we will add functionality on all other popular chains step by step.



LaunchAI Unique Features

- ## Zero Technical Skills

  ZERO technical skills is required to launch a token with LaunchAI. You launch your project using a wizard and it is done! You can then 100% be focused on your utility and community development and no worries about the smart contracts and stuff.

- ## Safe Contracts

  LaunchAI Smart Contracts are pre-audited and 100% SCAM FREE! LaunchAI assure Investors there are not any suspicious functions that would harm the investors such as stopping trading or pulling out LP.

- ## LP Tokens, 100% Safe

  LaunchAI will keep the LP tokens 100% SAFE by auto burn or locking lp tokens instantly after launch.

- ## Launch token instantly

  This means bots, snipers and even the owner himself cannot snipe the project or buy early! Everyone has same opportunity on buying right after LaunchAI bot sends the contract to the group/channel.

Ecosystem & Products

PresaleAI

Our set of automated presale tools will give project owners the ability to select best investors for their private sale positions to make sure they will have a solid price floor after launch with diamond hands of early buyers.

PresaleAI will gather and analyze all information about presale buyers and how they interact with projects to give a clear insight to other project owners and let them decide if they want to give out whitelist position to an investor or not.

SwapAI

Just tell the SwapAI what you want to buy, and what you want to pay. Leave everything else to the SwapAI. You will get your tokens in your wallet with best price in seconds.

UtilityAI

Need a utility for your project? Just give UtilityAI some inputs and have your utility ready specifically for yourself and well personalized by your needs.

Economy and Business Model

CryptoolsAI's products and services are not free. To use each product, user should pay a certain amount of money via Cryptools native token. We will store these payments in a wallet we call Cashier Wallet.

Cashier Wallet is playing the role of famous dead wallet in L2 chains which tokens would not be accessible to be sold. It is acting as a storage of ecosystem's earnings. This will help the chart to maintain a higher floor every time someone is using our services.

During our beta release of LaunchAI, we will not charge project owners for entry fee of using LaunchAI. It is free to use the service and launch tokens on this beta period.

We will have 15% share of total taxes by any project which is launched through LaunchAI. For example, If a project chooses to have 10% tax on buys and sells, we will get 1.5% of tax from each TX as Cryptools share from the project.

Economy and Business Model

This revenue will be transferred to our marketing wallet as chain's native tokens (eth on erc20 for example) and it will be used for buyback Cryptools tokens, development and marketing purposes.

Note 1: If project owner decides to launch the project with 0 tax, LaunchAI will add only a small amount of 0.1% to tax system in smart contract for its revenue.

Note 2: Cryptools will not get any tokens of any projects using LaunchAI. The only revenue stream from LaunchAI is using product fee (which is free during beta phase) and 15% share of taxes which project is collecting. We believe it is win-win situation.

Business models and revenue streams about other products of CryptoolsAI will be announced later.

CryptoolsAI Tokenomics

- There are no max limits for transactions and wallets.
- Smart contract ownership is renounced.
